PROFILE

Product-focused professional experienced in mobile game delivery, product requirements, cross-functional coordination and AI software development. Contributed to Netflix gaming projects and computer-vision functionality for Ray-Ban Meta smart glasses. Independently designed, built and tested AI products.

PROFESSIONAL EXPERIENCE

EYEBALL GAMES PTE. LTD. | Aug 2024 – Sep 2026

AI Engineer — Meta Ray-Ban Smart Glasses / IRL Pool Coach | Jul – Sep 2026

- Developed computer-vision functionality to detect pool balls and support shot recommendations from smart-glasses camera footage; trained and evaluated a YOLO11 model.

Project Coordinator — Netflix / Pool Blast | Feb 2025 – May 2026

- Defined phone-controller requirements, tested player interactions and translated gameplay feedback into product improvements.
- Coordinated development priorities, standups, project tracking and stakeholder updates through delivery.

Quality Assurance — Pool Masters / Apple Game of the Day | Aug 2024 – Dec 2025

- Led QA from soft launch through worldwide Android/iOS release, identifying and prioritizing issues with developers. Pool Masters received Apple Game of the Day recognition.
- Reviewed player reports and translated recurring issues into actionable product and development feedback.

SELECTED PRODUCTS

SlashCal — Founder / Product Builder | 2025 – Present

Independently scoped, built, tested and launched an email-first AI scheduling assistant that interprets replies, coordinates availability and supports meeting invitations.

Verdict — Creator / Product Builder | Jun – Aug 2026

Built an autonomous Android game-testing tool that runs on real devices and produces screenshots and logs; used findings to suggest Pool Blast level-balance improvements.

SKILLS

Product: Requirements, prioritization, user feedback, release planning, stakeholder coordination

Technical: AI agents, LLM APIs, computer vision (YOLO/ONNX), Python, JavaScript, React, Node.js, SQL/PostgreSQL, REST APIs
