

JOYMIE LACABA

Product Manager & QA · AI Automation · Support Operations

Angeles, Pampanga, Philippines | GMT+8 | Open to Remote

joylacaba52@gmail.com | LinkedIn | GitHub | slashcal.com

PROFESSIONAL SUMMARY

Product Manager and QA contractor for a Singapore-based mobile game studio through May 2026, starting in frontline customer support. Two years running delivery cadence, bug lifecycle, and stakeholder alignment on a live Google Play title — on the support side of the queue as well as the engineering side. Alongside that I design and ship LLM-backed automations end to end using AI coding assistants: SlashCal, an AI scheduling platform on PostgreSQL, and an autonomous outreach agent that classifies inbound replies and routes them without human triage. Comfortable taking something from concept to production and measuring whether it actually removed manual work.

PROFESSIONAL EXPERIENCE

Product Manager (Contractor)

Jan 2026 – May 2026

Eyeball Games Private Limited · Singapore (Remote)

- Owned direction and delivery for a live Google Play title and a second concurrent project across a 5-person team.
- Partnered daily with engineering, design, and stakeholders on scope, risk, and sequencing.

Project Coordinator & Quality Assurance (Contractor)

Aug 2024 – Dec 2025

Eyeball Games Private Limited · Singapore (Remote)

Title progression per signed contract addendums: QA Associate + Community Support (Aug 2024 – Jan 2025) → Project Coordinator & Quality Assurance (Feb 2025 – Dec 2025)

- Sole QA on Pool Masters: owned the full bug lifecycle in Notion from discovery through fix verification.
- Handled player-reported issues alongside a teammate — triaged reports, verified reproduction, and coordinated fixes. Support-side and engineering-side of the same queue.
- Ran daily standups and tracking calls, keeping developers, designers, and stakeholders aligned on status, risks, and next actions.
- Maintained project documentation including meeting minutes, action items, and risk registers.

Customer Service Associate

Sep 2021 – Mar 2022

Concentrix · Angeles, Philippines (On-site)

- Frontline support on the Ring (Amazon) account: high-volume ticket handling, troubleshooting, and escalation.

IT Assistant

Dec 2023 – May 2024

East West BPO · Angeles, Philippines (On-site)

QA Intern

Sep 2022 – Nov 2022

Twist Resources · Remote

NOTABLE PROJECTS

SlashCal / TruCal — AI scheduling platform

2025 – Present

- Built and shipped solo: React/Vite front end, Node/Express API, PostgreSQL, deployed on Railway.
- Natural-language scheduling assistant over LLM APIs, with a structured UI closing every flow so the assistant never silently commits a booking.
- Outreach agent that classifies inbound replies into reply classes and routes them, replacing manual triage.

Verdict — automated QA instrument for mobile builds

2026

- Drives shipped Android apps on real hardware and reads each app's own logcat back into a structured run record.
- Found a live defect in a third-party title: a class referenced at runtime and absent from all 16 dex files in the shipped APK, confirmed on two independent channels.

CORE COMPETENCIES

Python · JavaScript · SQL / PostgreSQL · LLM APIs and prompt design · AI coding assistants (Claude, Copilot, Cursor) · REST integrations · Notion, Jira · QA process and bug lifecycle · Support operations · Stakeholder communication

EDUCATION

BS Information Technology

Graduated June 2021

STI College
