PROFILE

Product-focused builder with experience taking mobile games from testing through worldwide launch, defining player-facing features, coordinating developers and stakeholders, and independently launching AI software. Combines product scoping, user feedback, release planning, hands-on prototyping and technical fluency across AI, mobile and SaaS.

PRODUCT EXPERIENCE & PROJECTS

SlashCal | Founder / Product Builder | 2025 to Present

AI scheduling assistant | schedulesync-web-production.up.railway.app

- Identified email scheduling back-and-forth as a user problem; defined, built, tested and launched an email-first assistant without requiring guests to learn a new app.
- Designed an assistant to interpret email replies, coordinate calendar availability and support meeting invitations; owned product scope and end-to-end execution.

Verdict | Creator / Product Builder | Jun to Aug 2026

Automated QA for Android games

- Built an autonomous testing tool that plays apps on real Android devices and produces understandable outcomes with screenshots and logs.
- Validated it against eight live Play Store games; applied it to Pool Blast testing and proposed level-balance adjustments to obstacles, ball positions and counts.

PROFESSIONAL EXPERIENCE

Eyeball Games Private Limited | Aug 2024 to Sep 2026

Singapore (remote) | Project-based contractor

AI Engineer | Jul to Sep 2026

- Built computer-vision functionality for IRL Pool Coach using Ray-Ban Meta camera input to identify balls and recommend shots; trained a YOLO11 detection model.
- Measured roughly 90% ball detection on test videos with no false detections reported; retained an earlier model when a candidate failed the predefined performance bar.

Project Coordinator | Feb 2025 to May 2026

- Defined the phone-controller specification for a Netflix mobile game; tested player interactions and translated gameplay friction into changes for the final experience.
- Coordinated daily standups, priorities, Notion tracking and stakeholder updates across development through delivery.

Quality Assurance | Aug 2024 to Dec 2025

- Owned QA for Pool Masters from soft launch to worldwide Android/iOS release; tracked 100+ bugs across 10 devices and helped prioritize launch-critical fixes.
- Handled approximately five player reports daily and converted recurring issues into actionable developer feedback.

EARLIER EXPERIENCE

IT Assistant | East West BPO | Dec 2023 to May 2024 • Hardware, software and network support.

QA Intern | Twist Resources | Sep to Nov 2022 • Test cases, execution and bug reporting.

Customer Service Associate | Concentrix (Ring/Amazon) | Sep 2021 to Mar 2022 • Device troubleshooting and escalations.

SKILLS

Product: Product scoping, requirements/specifications, prioritization, user feedback, release planning, stakeholder communication

Technical: AI agents, LLM APIs, computer vision (YOLO/ONNX), Python, JavaScript, React, Node.js, SQL/PostgreSQL, REST APIs

Delivery & quality: Notion, GitHub, Android/iOS QA, regression testing, bug triage, ADB/logcat, Claude, Cursor, Copilot

EDUCATION

BS Information Technology | STI College | Graduated June 2021
