

JOYMIE LACABA

Product Manager · AI Sales Tech | Founder, SlashCal

Angeles, Pampanga, Philippines | GMT+8 | Fully Remote

joylacaba52@gmail.com | [LinkedIn](#) | [GitHub](#) | slashcal.com

PROFESSIONAL SUMMARY

Product manager and solo founder who built an AI sales-copilot product end to end. My product, SlashCal (with its TruCal outreach engine), finds prospects, starts personalized conversations, handles replies, and books meetings automatically: the same sales-copilot category this role targets. I owned every part of it, from problem and ICP definition to roadmap, requirements, release, and metric-driven iteration on the sales funnel. Alongside that I spent two years as the coordination hub for a remote software team, running Agile ceremonies, writing acceptance criteria, and keeping engineering, design, and business stakeholders aligned. I pair real product ownership with a technical background (IT and QA) that lets me translate cleanly between users, sales needs, and engineers.

PRODUCT PROJECTS

SlashCal / TruCal — AI Sales-Copilot Product (Founder / Product Owner) 2025 – Present · slashcal.com

A live AI product I conceived, built, launched, and iterate on solo, in the exact category as this role. It automates the top of the sales funnel: discovers prospects, starts tailored conversations, classifies replies into intent, and books meetings, with a scheduling assistant on the other side. As product owner end to end I defined the problem and ICP segments, wrote the requirements and operating rules, prioritized the roadmap, and shipped releases. I instrumented the funnel with the metrics that matter for a sales tool (reply rate, positive-reply rate, booking rate, bounce, unsubscribe) and iterated on copy, targeting, and sequencing from that data. Made real product tradeoffs around deliverability guardrails, multi-channel sequencing (email + LinkedIn), and trust. Stack: React, Node.js, PostgreSQL, Claude and Gemini, deployed on Railway.

NativeEyeQA — AI Mobile Test-Automation Tool 2026 – Present · C# / .NET 8, Appium

A second product where I wrote the PRD, defined scope and positioning (a copilot for QA engineers, not an autonomous replacement), and prioritized a phased build. Grounded in my own QA experience, it shows I can take a product from a written vision to a scoped, prioritized plan.

PROFESSIONAL EXPERIENCE

Project Coordinator & Quality Assurance (Contractor) Aug 2024 – Present

Eyeball Games Private Limited · Singapore (Remote)

Title progression per signed contract addendums: QA Associate + Community Support (Aug 2024 – Jan 2025) → Project Coordinator & Quality Assurance (Feb 2025 – Present)

- Act as the main point of contact between engineering, design, and business stakeholders for a 5-person team across a live title (Pool Masters on Google Play) and an unreleased project, keeping everyone aligned on scope, priorities, and risk.
- Own and prioritize the backlog: run daily standups and sprint / task prioritization, translating stakeholder needs into clear work items.
- Defined the product requirements and use cases for a new in-game control scheme, specifying intended feel, function, and edge-case behavior (the acceptance criteria), reviewed and approved by stakeholders before build.
- Own the full bug lifecycle in Notion from discovery through fix verification, and drive release readiness and sign-off as sole QA on Pool Masters.
- Gather player feedback and coordinate playtests, turning real usage into prioritized product changes.

Customer Service Associate

Sep 2021 – Mar 2022

Concentrix · Angeles, PH · On-site · Account: Ring (Amazon)

- Supported US customers for Ring smart-home products across phone, chat, and email; learned to read customer pain quickly, triage, and escalate. This customer-discovery instinct is what I now bring to product decisions.

QA Intern

Sep 2022 – Nov 2022

Twist Resources · 3-month internship · Remote

- Manual functional and regression testing within Agile release cycles; wrote test cases and logged bugs in JIRA and TestRail; collaborated on triage and release sign-off.

IT Assistant

Dec 2023 – May 2024

East West BPO · Angeles, PH · On-site

- IT helpdesk support across a high-volume, US-hours operation: account setup, access management, troubleshooting, and onboarding / offboarding across multiple teams.

CORE COMPETENCIES

Product Management:	Product vision & strategy · Roadmapping · Feature prioritization · Requirements & use cases · Full product lifecycle (conception to launch and beyond) · Go-to-market coordination
AI & Sales Tech:	Built an AI sales-copilot product · LLMs (Claude, Gemini, OpenAI) · AI-driven prospecting, reply classification & meeting booking · Sales-funnel mechanics & deliverability · Prompt design
Analytics & Discovery:	Funnel KPIs (reply / positive / booking / bounce rates) · Metric-driven iteration · Activation modeling · User feedback & playtest research · Competitor and market scanning
Cross-functional:	Stakeholder management · Engineering & design collaboration · Main point of contact for product updates · Clear written and verbal communication
Agile & Tools:	Scrum · Kanban · Jira · Trello · Notion · Sprint planning, reviews & retrospectives
Technical:	JavaScript · SQL · React · Node.js · C# / .NET 8 · REST APIs · Git · comfortable reading code and writing specs with engineers
Languages:	English (professional) · Filipino (native)

EDUCATION

Bachelor of Science in Information Technology

Graduated June 2021

STI College
